How to Automate your YouTube video upload information

so we're back
so in this video we're going to talk
about how to make some automation so
every time you go ahead and upload that
new video to youtube
some of that information is already
there and you don't have to retype it in
each and every time
so join me for this video
let's learn how to automate your YouTube
channel
this channel bit by bit it doesn't take
rocket science but it does take a little
bit of time
to go ahead and decide what you want to
do and every time you upload a video you
don't want to be taken 10 15 sometimes
up to a half an hour to be filling in
all the blanks and clicking all the
settings that you need to have
for each and every video
so today I'm going to show you how you
can set this up this information will be
put in place each and every time
a new video is propagated for your
YouTube channel
so let's go over we're gonna share the
screen
so this is my channel
this is the channel where
the content that i make for you comes
from so as you can see i have my banner
of wheezy this is the desktop model
um
i have it set so the wheezy in my face
comes up sorry i'm doing a little review
here are all my videos
here are my playlists
uh i don't have any other channels about
and this is where we want to start
so did you see i went across this
bar right here home videos playlist and
about about we
we want to fill that in
you want to give
a description of what your channel is
about so that when people come to see
your channel they know who you are and
who you serve
so i create videos in order to teach

people who are a little hesitant to get
in front of the camera and need to take
process a little bit slower i call
myself the turtle wrangler
so many meanings with just one little
creature
but we're not going to talk about that
today
so if people want to know how to find me
they have business inquiries
i have my
email just type in your email here
if you have associated with your website
or anything an info or that
that catch-all email
go ahead and use that but try to use
something that has your
website address in it or you're a dummy
uh gmail account for them to
go ahead um i have this up i have links
associated with this channel
um
and so i drive them to my
website
and they can go ahead and get my gear
guide
so we're going to go over here and we're
going to find settings
and under settings we have general
channel
upload defaults permissions community
demographics and agreements under
general
all that is here is you know if you're
going to take in money go ahead and
select that of what currency
use the pull down to choose your country
we're going to go over here to now let's
go check out channel channel is what you
want because this is where we're going
to do
all your automation so we're going to
start out with basic info so there's
basic info advance
settings and feature eligibility
we want
basic info for right now
so what country do you reside in
united states but there's a pull down
where you can make the selection
if you
[Music]
are unsure about this you can right here

is a learn more it is blue that means
it's a link where you can get more
information and you can go ahead and
read about that on your own
this is where
i talked about before setting in your
keywords
and
we went over a lot of that but go ahead
and get those keywords put in there so
that you have them always
and
let me go ahead and add
you
channel
now now that i put in a new word
the save button will come up
it's blue save button down at the
bottom right
and you can have as many as 500
characters i have 394.
go ahead and hit save
settings saved
put me back over here um
so now that we
we're going to go back to settings for a
minute
because i want to make sure that you
have everything that you need here
channel
advanced settings okay
so this is where you're going to set up
your
settings
and
do you have an audience is it made for
kids i know we discussed this but
make whatever marks you need here so
that you have it done
if you're linking for your youtube ads
link your account here
i don't have an ad account
automatic captions
don't use inappropriate words
so click that if
say you are a cusser but you don't want
it to show up in text because you might
get strikes against you
hit that
subscriber account display the number of
people subscribed to your channel
block that or
you can block that or go ahead and

select it i have mine selected for this
at this time
disable interest based ads so
if you select this option personalized
ads will not be shown on videos on your
channel so
anything of interest to those people
ads are going to propagate from your
video
so if you respect their privacy
you may want to disable this
i want to go back
we're here in barry's account we're
going to go over here we're going to go
back to settings
and we're going to go
there here's general here's channel now
we're going to upload defaults
and it's going to show basic information
and advanced settings
so
this is where you can put in the
automation something that's going to
show
maybe in each title so
for this sake barry's channel it's going
to be
berries
how to
and then a colon
and then each video he can fill in what
the how-to is about
description
if you have a website
or
information that you're purposely going
to use each and every time
you want to put this in the description
and it will auto populate each time you
go to upload so we want to go ahead and
say
if
you
like
this content
please
subscribe
and share
my
u
tube
channel
easy peasy

but anything that you want to put in
there um you might
if you have a description that you
always want to have or you have times or
other things that you want to promote
go ahead put all of that in there at
this time
visibility select
this is where you hit private so that
it's always when it uploads it's going
to be automatically private until you're
ready to change it
tags any tags that you're going to use
over and over and over again this is
where you want to put them
so
how
to
separate with a comma
Barry's
how
to
build
berries
how
to
fix
tab
tab or comma you know but you get the
idea those are things that each time we
would upload a new video here they will
come up
and
that's
so that's your basic information right
there hit save
okay so that shut that out so we're
going back over
to his settings
pull that up again
upload defaults now we're going on to
advanced settings
here we are that's activated automatic
chapters
just go ahead and click that so that if
they're ever available
you have them
you have your standard youtube license
you want to make sure that that is
selected
category none we want to go in here
and select our category so these will
automatically be upload to how to and

style but
see there's all sorts of things to
choose from
and you choose what category you want
but for berries
we want that how-to and style
language
go ahead and pick your language we're
going to look for english
there's like four englishes five
englishes we want english
well there's english and then there's
you
english united states
let's go for that
caption certification
we don't have that so we don't have any
but if you pull down here are the
different things that they are looking
for
in the captions
title and description of language
again let's look for english
english united states
this is where you can choose where to
hold the comments
save
okay so as
as i'm clicking around here
underneath this channel name and
description
this is where you're going to find your
channel url this is a link that you want
to connect with your website
you want to have it in your email
subscription if you're gonna but any
place that you're gonna share your
youtube link
you might wanna copy and paste this
onto a document so that it's all
together
and then for contact information you
want to have your email address down
here so anybody with business inquiries
i know that i talk about this in every
video but it's imperative that you have
that
so
we're
so that is filled in
so i think we have everything filled in
to get you started to
for the automation of your youtube keep

going back to see if there's more things
that you can fill in
but just hunt and peck
but get used to that dashboard
look at those titles see what other
things are available to you
for each time that you
go ahead and upload that new video
i just really encourage you to go ahead
and get this channel started
you have three key components
to get you started now
and making these videos
so now you don't have
now you don't have an excuse of going
well i don't know how to upload to
youtube i don't know how to start my
channel
there's no more excuses it is time to
just go ahead
sit down
it might take you a little bit of time
but it will be time
well spent i hope you found this helpful
like i said if you have questions just
reach out and ask me i'll talk to you
soon bye
